Lash & Brow Masque FAQ

Is Lash & Brow Masque physician developed?

Yes! Lash & Brow Masque is physician developed.

Why use Lash & Brow Masque when I already use RevitaLash® Advanced and/or RevitaBrow® Advanced?

Much like skin and hair masques take daily moisturizers and hair conditioners to the next level, Lash & Brow Masque contains intense, nutrient-rich ingredients that will repair damaged, compromised lashes and brows. In our consumer studies, users noticed improvement in the look and feel of lashes and brows after just one use, and even better with consistent use. If you have an event, are recovering from a lash lift or brow lamination, or just need some TLC, this masque is an easy addition to your routine.

When using RevitaLash Cosmetics' Lash & Brow Masque in conjunction with RevitaLash® Advanced or RevitaBrow® Advanced, ensure that the formula is completely rinsed off before applying your lash or brow serum on clean, dry lashes or brows.

What is Tri-Flora Complex?

Tri-Flora Complex is an innovative blend of powerful botanicals, including Ginseng, Gleditsia & White Nettle. This carefully formulated botanical blend synergistically works to address dry, brittle, lifeless hair by restoring shine and vitality, fortifying each strand of lash or brow hair and restoring health.

How many applications does each tube contain?

Each tube will last approximately 2-3 months depending on usage (lashes/brows) as well as frequency.

Can I use this with lash extensions?

We do not recommend using Lash & Brow Masque while you are wearing lash extensions. While the formula itself is oil-free and would not compromise the glue of the extensions, typically less is more when caring for them.

RevitaLash Cosmetics' Lash & Brow Masque is the perfect product for when you are looking to restore your lashes after lash extension removal. In fact, its reparative ingredients will nourish your lashes and promote the look of softer, shinier, healthier and more flexible lashes.

The only treatment we do not recommend using Lash & Brow Masque with is lash extensions. While the formula itself is oil-free and would not compromise the glue of the extensions, typically less is more when caring for them.

Do I have to use the comb to remove the product?

While we recommend using the comb to remove product for efficiency, as well as to protect lashes and brows from damage, alternatively, you can generously wet a washcloth/cotton round/facial sponge with warm water and apply to lashes and brows, continuing to soak until product begins to loosen or release from the hair (about a minute). Using the washcloth/cotton round/facial sponge, gently wipe away product from the eye area and face until clean. Do not pull or tug at lashes and brows to remove product as this can be very damaging.

Can I leave the Lash & Brow Masque on overnight?

We do not recommend leaving the Lash & Brow Masque on overnight. 15 minutes (or until product dries fully) is an ideal length of time to allow the ingredients to work on repairing lashes and brows.

Can I use Lash & Brow Masque daily?

REVITALASH[®]
COSMETICS

While we recommend using our Lash & Brow Masque at least twice per week, there would be no risk in using it daily.

Can I wear Lash & Brow Masque while in the shower?

Because water and steam can loosen the formula, preventing the tubes from fully forming and enveloping the lashes and brows to properly deliver the restorative ingredients, we would not recommend use of this product while in the shower. It is best to maintain a dry environment while wearing the masque.

What is the shelf-life for unopened Lash & Brow Masque?

Revitalash Cosmetics Lash & Brow Masque has a shelf life of 31 months, and is good for 6 months after opening.

Is Lash & Brow Masque safe for contact lens wearers?

Yes! When applied per the directions and avoiding contact with the eye, this product is safe for contact lens wearers.

Is Lash & Brow Masque safe for pregnant or breastfeeding women?

The safety of our products has been demonstrated in multiple studies conducted by independent research laboratories. Our products have been shown in these tests to be safe to the hair and skin in adult study subjects. That said, if you are pregnant, breast feeding, or undergoing any medical treatment and have concerns about using any product, please consult with your physician.
