You might pay close attention to nutrition labels, but if asked to name the active ingredients in your facial cleanser, could you answer? Whether it's brand loyalty, pretty packaging or simply a delightful scent that draws us to a skincare product, we rarely know how the ingredients benefit our skin. My solution? I try picking my skin care products like I do my groceries: the more natural the ingredients, the healthier my skin is.

Now, I'm not suggesting pureed banana in place of your moisturizer, but rather choosing products with at least one fruit-enzyme as an active ingredient. When ingested, fruit-derived enzymes allow the body to properly digest

“Two fruit-full products that use the delicate exfoliating properties of green unripened papaya are Jan Marini's Clean Zyme Cleanser and Skin Zyme Mask. The rejuvenating cleanser reduces follicular retention, which helps to clear acne and prevent breakouts. Without causing irritation, the gentle exfoliating mask reduces hyperpigmentation, scars, and age spots as it digests dead and damaged cells on the skin's surface. And, unlike other exfoliating products that are too harsh for frequent use, these “supplemental home care products” are meant to replace your cleanser and can be used just as regularly.”
